

SETTING THINGS UP

1 Complete Application / Signup Online

Your solution will be setup within one business day after signing up.

2 Link Your Website to Your New Gift Card Purchase Application

You or your web developer will receive the code to copy and paste onto your website. For the best results, optimize your website to effectively promote your gift cards or certificates.

3 Merchant Account Setup (Optional)

If you select to connect your merchant account to the system, we can assist you with completing the steps necessary to make this happen. If you do not complete this step, you will simply run the credit card yourself through your existing POS when a sale is made. While there are some additional costs to this setup, it is an optimal setup for a business that does a higher volume of sales.

PRICING

- **\$149 Setup Charge**

For just \$149 you can be selling your gift cards or certificates online.

- **\$4.99 Per Month**

There is a \$4.99 monthly charge for the program. If the business wants to connect their merchant bank to the solution to immediately deliver funds to their bank the charge is \$24.99 per month.

- **4.7% Service / Support Charge**

The 4.7% Service fee is charged on the transaction volume for the use of the application, monitoring of sales and email delivery as well as any needed support. This has nothing to do with any Merchant Credit Card Fees assessed by their Bank. This fee can be reduced for businesses with high volumes of sales. Speak with a Giftango representative for details.
